

Seatrium Cloud

Audit: 5-7 years
SOT: 10 years

* 1 Server for SAP App, DB and
GRC (Access Control Mgmt)

SAP RISE

Multiple servers for High Availability (SAP App, DB
and GRC)

Summary

1. Pegasus (OEP) data and attachments are to be copied over to Seatrium Cloud.
2. The new SAP server (with the latest Windows version and service pack) in Seatrium Cloud will house SAP application, S/4HANA database and GRC (Access Control Management module) and access the local copy of the attachments.
3. Users will access via Seatrium WAN and have display access only.
4. GRC module (Access Control Management module) is to enable users to raise GRC request for display access.
5. Auto-termination of SAP userids (based on AD and Workday), using existing batch job processing.
6. Propose best practice for such archival.
7. Support OpenText consultants in the deletion of SEP and OEP attachments in Seatrium Cloud and SAP RISE respectively.
